EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given by examiner to change Title into "Multi-domain liquid crystal display device with slit and auxiliary electrode line".

DETAILED ACTION

Claims 2-25 are cancelled.

Claims 1 and 26-33 are pending.

Allowable Subject Matter

Claims 1 and 26-33 are allowed. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowed since there is no prior teaches a multi-domain liquid crystal display device, comprising: an auxiliary electrode line electrically connected to the first gate line or the second gate line, the auxiliary electrode line and the multi-domain structure distorting an electric field applied between the common electrode and the pixel electrode to thereby form at least two domains in the pixel region during an operation of the multi-domain liquid crystal display, wherein

- the auxiliary electrode line is formed between the pixel electrode and the first data line or between the pixel electrode and the second data line and the auxiliary electrode line is spaced apart from the first and second data lines, wherein
- the common electrode includes the slit,
- the auxiliary electrode line takes advantage of the gate signal applied to the first and second gate lines to form the multi-domain,
- the gate line has a larger width than the auxiliary electrode line,
- the auxiliary electrode line comprises a first auxiliary electrode line extending from the first gate lines to the pixel region in a direction parallel to the first data

Art Unit: 2871

line and a second auxiliary electrode line extending from the second gate line to the pixel region in a direction parallel to the second data line,

- the auxiliary electrode line does not overlap with the pixel electrode.

Claims 26-32 are allowed since they depend on the allowed claim 1.

Claim 33 is allowed since there is no prior teaches a multi-domain liquid crystal display device, comprising: an auxiliary electrode line electrically connected to at least one of the gate lines in each pixel region, the auxiliary electrode line and the multi-domain structure distorting an electric field applied between the common electrode and the pixel electrode to thereby form at least two domains in each pixel region during an operation of the multi-domain liquid crystal display, wherein

- the auxiliary electrode line is formed between the pixel electrode and the data line at an outside of the pixel electrode in the pixel region and the auxiliary electrode line is spaced apart from the data line, wherein
- the common electrode includes the slit,
- the auxiliary electrode line takes advantage of the gate signal applied to the gate lines to form the multi-domain,
- the gate line has a larger width than the auxiliary electrode line,
- the auxiliary electrode line does not overlap with the pixel electrode.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
